

Chapter 28 - Carpeting

Things to Consider

- Carpeting will only be installed in the bedrooms, Halls, 2nd floor stairways. These areas are at the discretion of the Home Owner.

Components

Preparing subflooring	Carpeting	Carpet Shield
-----------------------	-----------	---------------

Timing & Prerequisites

- This phase will be scheduled within 2 weeks of the dedication.
- The House/Project Lead and Supervisor will co-ordinate these activities.
- This phase requires all interior construction to be completed and construction materials removed from the house.

Materials Needed

Carpet Shield

Phase Specific Tools Needed

Description:

Quantity:

Framing

- Putty Knife
- Shop Vac
- Rags
- Vacuum Cleaner

Activities

Clean the Floor and Stairs (Volunteers)

1. Remove any spackle of other adhesives which may be stuck to the floor with a putty knife.
2. Wash off any mud which may have built up over time on the stairs and flooring.

Lay the Carpeting (Contractor)

The contractor will install the carpet tack strips, padding and carpeting. They will also cut back the vinyl and install thresholds.

Install the Carpet Shield (Volunteers)

1. Vacuum the carpeting.
2. Install carpet shield.

3. The carpet shield will be installed wall-to-wall in all carpeted rooms; halls; and stairs.
4. Do not install carpet shield on the vinyl.
